At Third Street M. E. Church Began Last Evening—Dr. Aultman Delivers Fine Sermon.

The revival services which have been heralded for several weeks past, began last night at the Third Street M. E. church.

A good crowd was present at the opening service and a good spirit was manifested.

Dr. Aultman, who will do the preaching at these services, arrived yesterday afternoon and last night delivered an excellent sermon on "What Kind of a Christian Are You?" He ended his address with a plea to all to put aside everything that would be a hindrance to them and to co-operate in the work of winning souls for the Master.

Services at the church again this evening. The song and prayer service will begin at 7:30 o'clock and will last for half an hour. Then Dr. Aultman will speak. Come out this evening and hear him. He is a magnetic speaker and his messages are truly inspired from God.

City Mission 25.00
Colored Mission 6.25
Pensions 76.00

Total \$3,196.05

The wharfmaster reported \$50.72 as the total amount of wharfage collected during the past month.

The Fire Department reported that they had answered four alarms of fire during the month of March.

Building permits were issued as follows:
Addison Carter, outhouse on lot at Third and Walnut streets, Fifth Ward.
James Frost, metal covered shed, 8x8, on Cherry street, Third Ward.

Mary E. Woods, frame dwelling of five rooms and attic, metal roof, with all necessary outbuildings, on Forest avenue, Fifth Ward.

C. H. Boughton, addition to and remodel house on Lexington street, Fifth Ward.

Mrs. Jennie White Jackson, one and one-half story frame house on East Third street, Sixth Ward.

The Board of Health asked that the Propositions and Grievances Committee meet with that board some time this week to take up the matter of the disposal of the city garbage, one of the most vital propositions confronting the city officials.

The bill of Landford Henson of the Henson Hotel, for bedclothes and bedding burned that a man named White used, who died there, was tabled.

The Mason County Woman's Club petitioned Council to see that the curfew, anti-spitting and cigarette ordinances were enforced. Received.

Two remonstrances against brick streets were read by Mayor Lee. One was from Wall street residents and one from Limestone street residents.

The proceedings then took on a Congressional aspect. Mayor Lee, after reviewing the proposed ordinance calling for the brick of practically every street in the city, presented his official pencil and vetoed several streets—Wall, Court, Market, Limestone, Plum and Carmel, giving as his reasons that on some the people were not able to stand the cost of construction; on others the grade was too much, above 5 per cent, and still others that they had just been rebuilt. This was the beginning of the end of the brick street improvements for this city, as Member Easton thereupon made a "heap big talk" against Mayor Lee's action, in stating something, whereupon the Mayor vacated the chair, appointed Member Keith to preside, and undertook to explain to the satisfaction of Member Easton his views on his veto; but Member Easton "didn't seem to get him."

City Engineer Glazier then tried to handle the situation, but it was beyond that point, and his very capable and lucid explanations were futile. Among other things, Mr. Glazier told the Council what every one in the Eastern End of the city claimed at the time it was being done, that the streets were out of line, in other words, were ruined, especially the curbing, and said that the best thing to do was to make Second street a uniform width of thirty-six feet.

City Attorney Calhoun then read the brick street ordinance, with the vetoed streets eliminated. It included Sutton street, from Front to Third; Market street, from Front to Second; Third street, from Bridge street to Hunter's alley; Bridge street; Second street, from Limestone to Bridge street; Second street, from Bridge to Carmel street. The ordinance was then placed on its passage and by a yea and nay vote this is the way we don't get brick streets:

Messrs. R. L. Samuel and Harry Otto were allowed \$42 each for assisting the City Engineer.

The work of City Engineer Glazier will be completed.

A taxpayer of the Fifth Ward was given permission to address Council, and he asked that something be done to relieve the residents along Second street of the dust. Councilman Fleming moved that it be referred to the Internal Improvements Committee to scrape it and have it hauled off, and Member Crowell secured the flusher's services also.

The matter of sewers on Wood and Lexington streets and Forest avenue was referred to the Propositions and Grievances Committee.

The bill of the Washington Fire Company for \$114.96 was referred to the Fire Committee.

Council then adjourned.

We are very sorry to announce that the illness of Bishop Burton of the Diocese of Lexington, has developed into nervous prostration, and he will be unable to come to Mayville for his annual visitation on April 18, but hopes to be here at an early date after that time.

Concerning Soil Tillage

After the ground is plowed, it should be disced and harrowed until all lumps are finely pulverized. This is because the delicate plant roots cannot penetrate hard lumps and are, therefore, deprived of much plant food. Tillage increases the availability of plant food elements by changing the arrangements of soil particles and bringing together those that have not before been in contact. It also changes the relation of the soil with air, water, salts and acids in the soil, making available plant food that would otherwise remain dormant.

A DOLLAR THAT CAN'T BE SPENT.

Every dollar spent in advertising is not only a seed dollar which produces a profit for the merchant, but is actually retained by him even after he has paid it to the publisher.

Advertising creates a good will equal to the cost of the publicity.

Advertising really costs nothing. While it uses funds it does not use them up. It helps the founder of a business to grow rich and then keeps his business alive after his death.

It eliminates the personal equation. It perpetuates confidence in the store and makes it possible for a merchant to withdraw from business without having the profits of the business withdrawn from him. It changes a name to an institution—an institution which will survive its builder.

It is really an insurance policy which costs nothing—pays a premium each year instead of calling for one and renders it possible to change the entire personnel of a business without disturbing its prosperity.

Advertising renders the business stronger than the man—dependent of his presence. It perpetuates systems of merchandising, the track of which is left for others to follow.

A business which is not advertised must rely upon the personality of its proprietor, and personality in business is a decreasing factor. The public does not want to know the man who owns the store—it isn't interested in him, but in his goods. When an unadvertised business is sold it is only worth as much as its stock of goods and its fixtures. There is no good will to be paid for—it does not exist—it has not been created. The name over the door means nothing except to the limited stream of people from the immediate neighborhood, any of whom could tell you more about some store ten miles away which has regularly delivered its shop news to their homes.

It is as shortsighted for a man to build a business which dies with his death or ceases with his inaction, as it is unfair for him not to provide for the continuance of its income to his family.—Herbert Kaufman.

THE BOY AND HIS FATHER.

Emil Steffens, Sr., the lithographer, made the following translation of a paragraph in the "Staats-Zeitung," entitled "What a Boy Thinks About His Father." Numerous copies have been made by Mr. Steffens' house and circulated: "At 10 he thinks his father knows a great deal. When he is 15 he thinks, 'Well, I know just about as much.' At 20 he thinks he knows again as much. When he comes to be 30 years old he thinks that he ought to ask his father's advice sometimes. At 40 he thinks that his father does know a little more. At 50 he looks for his father's advice. At 60, and his father is dead, he comes to the conclusion that there was not a smarter man on earth than his father was."—New York Press.

TWO KINDS OF TARIFFS.

Present conditions well illustrate the workings of a protective and a competitive tariff. Under a protective tariff domestic manufacturing is encouraged and materials for use in manufacturing are more extensively imported. Under a competitive tariff, the finished goods are imported, our mills and factories work from hand to mouth, and the demand for materials for use in manufacturing declines.—Mr. Vernon (Ind.) Republican.

LIFE IS NO SINGLE TRACK AFFAIR.

That Harrodsburg girl who spent a lot of time seeking for a perfect man for a husband, has given up the quest in despair. Probably while she was looking for the perfect man, the perfect man was looking for the perfect girl, so they missed each other.—Harrodsburg Herald.

STOLL FOR LIEUTENANT GOVERNOR.

Some one has suggested Hon. R. T. Stoll of Lexington as a likely candidate for the Republican nomination for Lieutenant Governor. The suggestion is a good one and we believe no better man could be found for the running mate of Morrow.—Mt. Sterling Gazette.

LIGHTING THE DARK PLACES.

Chicago is to light up its dark places by adding 10,000 new lamps to its illuminating equipment. There is to be a light on every corner, and in places where it is a long way between corners there are to be additional lights.

"STATE WIDE" NOT POPULAR.

If there is a single Democratic newspaper in Kentucky which favors making state wide prohibition an issue in the Governor's race, it has not come to our exchange table.—Elizabethtown News.

As a high-finance Billy Sunday seems to lead Billy Jennings Bryan several laps in the free-for-all race for the fryan lucre. However, W. J. B. is an easy second.

William Jennings Bryan will also go down in history as the man who put "talk" in Chautauqua.

GOOD POINTERS ON TOBACCO SITUATION.

The Tobacco Growers' Association organized for—no man knew just what, after casting about for plans and formulate for increasing the price of the growers' tobacco 100 per cent at a single stroke, have made tentative plans for organizing a cut-out in the year 1916.

Men who read even surface conditions know there will never be another cut-out for some years to come unless the state of Kentucky abolishes its constitution, and trains a German army for the purpose of preventing growers vi et arma, from raising tobacco.

The former cut-out made a huge fortune for one man—you can see his limousine almost any time on the streets in Lexington, but as far as the ordinary grower is concerned, it is doubtful if the results paid them for the bloodshed and lawlessness it occasioned. We think the Tobacco Growers' Association and those in charge of it had better guess again.—Paris Democrat.

FACTS ABOUT RAINFALL.

In the single month of January, 1909, over 71 inches of rain fell at Helen Mine, Cal. Rainfalls of over 10 inches a day have also occurred occasionally in the United States. An inch of rainfall is equivalent to 113 tons of water per acre, or nearly 1,000 barrels.

The influence of rainfall on sheepraising is remarkable. In Australia, where the annual rainfall is from eight to ten inches, they can graze about nine sheep per square mile. With 13 inches of rainfall the same area will support 96 sheep, and with 20 inches of rainfall 610 sheep.

These figures are furnished by J. W. Smith, an Ohio weather observer, who says also that for every increase of rainfall during July in Ohio amounting to one inch the increase in the value of corn alone amounts to over \$2,000,000. Farm and Fireside.

PASTURING A PERSON.

How much land does it take to support a cow, or a horse, or a hog? Rather important questions to every one of us, but not so important as the query:

How much land does it take to support a person?

A recent survey made by the United States government in Ohio seems to show that it costs on the average \$197 to board and house each person on the farm.

That is, the husband, wife and three children must have an income of \$985 if they live as well as the average.

That is the income in dollars, and the examination—or 44 farms—indicates that it takes 40 acres to "pasture" a person.

UP TO THE 1916 LEGISLATURE.

Much stress is being laid upon the issue of state wide prohibition as affecting the candidates who are now running for the Governorship of Kentucky. As a matter of fact, it makes very little difference how they stand. If the matter comes up for action at all—which it should not—it will come before the next Legislature which assembles a year hence. The Governor then will have practically nothing to do with the matter. The candidates for the Legislature in the different counties, are the ones upon whom the question rests more than any other candidates. The Legislature of 1916 will have the matter in hand if it comes up at all.—Hartford Herald.

THE WASHINGTON FLUNKY DOODLES.

Vice President Marshall says, "Americans are the greatest flunkies and lackeys in the world." Makes the mistake of sizing up the rest of the country by President Wilson's trained body in the United States capital.—Hunting Herald-Dispatch.

All "hesitations" look like 30 cents to the one Italy is now pulling off.

FOOLISH PHILOSOPHY.

Just because conscience makes cowards of us all is no reason why a brave man should have no conscience.

Many a man is more of a fool than he thinks he is, and less a fool than his friends think him.

Most of us would live up to the golden rule if it wasn't for an overwhelming desire to get even.

Strong drink may drive away dull care, but it will come back even sharper in the morning.

THE RIVER.

Pittsburg, Pa.—The packet business on the Ohio river continues good, with heavy freight shipments between way points and the terminals. The decline in the river stages is slow and rivermen are hoping that the upper Ohio river will not drop to a point that will interfere with packet navigation before the April rains come to the rescue.

The old river men say that the Ohio river was lower during the month of March than they had ever seen before. There was very little snow or rain during the month and the Ohio river has been falling slowly since March 8, when there was 21.3 feet recorded in the Cincinnati district.

A MEDICINE OF MERIT.

A proprietary medicine, like every thing else that comes before the public, has to prove its merits. The law of the survival of the fittest applies in this field as in others. The reason for the tremendous success of Lydia E. THE BOY AND HIS BALL GROUND.

Loitering habits of boys are largely due to lack of convenient playgrounds. It is the rule in the majority of towns, that though there may be a few outlying playgrounds, yet the average boy has difficulty in finding a place where his own set of youngsters can meet.

Boys are very tribal in their habits. Each has his own set, and dislikes to dare not try to break into some other set. He will venture over into another's neighborhood only on being backed and protected by a group of his own comrades. The neighborhood ball nine may journey over to the other end of a town on a Saturday afternoon for a match game. But ordinarily they will play their own district or not at all.

It is not practical to establish a playground for every little section of a town. But there are vacant lots, and owners should be generous. Also the neighbors should not be too sensitive. The kidslets may be noisy, but the chance to play freely near home may be the making and saving of them.

BRITISH AMERICAN'S LIBERAL POLICY.

The British American Tobacco Company, Limited, from its headquarters in London, England, has announced that in view of the general increase in the cost of living, owing to the war, each of their employees in the United Kingdom whose earnings do not exceed \$200 a year will, each four weeks, during from the first of this month, receive an emergency allowance graduated according to their wages.

DANISH TOBACCO SUPPLY CUT OFF.

Danish tobacco importers, says a Copenhagen dispatch, have been informed from Germany of the order prohibiting the export of all kinds of tobacco from that country.

This means a fatal blow to the Danish cigar and cigarette industries, as almost all the tobacco used comes from Bremen, and freights are now so high that it is impossible to obtain tobacco from America.

TOBACCO GROWING IN AUSTRALIA

The Secret Sought 400 Years Found at Last

If Ponce de Leon, the ancient explorer who sought the supposed "Fountain of Youth" in Florida 400 years ago, had instead discovered the life-giving properties of "Trutone," as they are known today, he would have proclaimed to the whole world: "I have found that for which I sought—the Renewer of Youth!"

And he would have been right, for there is not the slightest doubt that "Trutone" Tablets will, when properly used, prolong to a wonderful extent the vigor of healthful youth in both men and women.

"Trutone" puts real life, vigor, vitality and sturdy strength into every nerve, muscle and organ of the body and makes life worth living again—makes you glad to live! Even nervous troubles and insomnia end as if by magic.

HAMMERSTEIN'S WONDERFUL CAREER.

New York, April 6.—Oscar Hammerstein's present financial troubles, resulting from the efforts of creditors to put him into bankruptcy, may perhaps be properly spoken of as the anti-climax of a most wonderful career. He came from Berlin to America in search of his fortune when a young man. He was without friends and desperately poor. According to some who have known him almost from the day of his arrival, he began life in the new world as a cigar-maker here in New York.

At all events, he made his first strike by the invention of a cigar-molding machine. It was such a good thing that he put his wife to work and constructed another machine for the working up of raw tobacco, and then another. And from each in succession he reaped large financial rewards. Then he made more money out of a tobacco trade paper. By this time he had accumulated something of a surplus, and he bought a row of empty flats on Eighth street, which filled with tenants, as if by magic, directly. Then, to the dismay of some of his best friends and advisers, he became interested in real estate along both sides of One Hundred and Twenty-fifth street, then only an unconsidered cross thoroughfare so far up town as to be the undisputed home of the squatter and the goat. Investigation proved to Hammerstein that this property was good enough, for him, and he bought lots there as fast as he could raise the money. Soon after the boom in that section arrived, and he found himself worth close to \$1,000,000.

On top of his money troubles, Hammerstein is handicapped at present by poor health. Those who know him best predict confidently that if he recovers his health he most certainly will recover his fortune in the course of time. In the meantime all those who love a plucky fighter will join in hopes for his ultimate recovery and future success.

FAMILY RECONSTRUCTED.

A Mercer county physician recently called Mrs. Ruby B. Grober, the nurse put into the county by the State Tuberculosis Commission, to attend a sick man for him. This man had dropped in weight from 165 pounds to 105 pounds. The nurse met the man at a country store, and accompanied him to his home. There she found his wife and six children all in bad health. The nurse secured a proper examination of all the family; and all eight were found to have hook worm. She secured proper medical attention for them. This entire family is now on the way to recovery.

The visiting nurse who goes out hunting for the sick finds them often at the beginning stage of some disease when they can be cured. If left alone many such persons, ignorant of the dangers of consumption and other diseases, will not secure medical attention until too late.

SWAT THE FLY.

This is the time of year to swat the typhoid fly, better known as the common house fly. The few flies that survive the winter produce the millions which in the next August crawl through manure piles and through heaps of filth, over the butter, tickle your bald spots and finally are drowned in the baby's milk. From filthy privies which exist in every locality, they may take typhoid fever germs to your table. From the sputum of consumptives, flies may bear the germs of tuberculosis to you. Swat one fly now and you prevent the coming of uncounted thousands in August.

GOOD JOKE, BUT OLD.

"The best April Fool stunt I know of," says a man who plays them, "is to run a white thread through the back of your coat, with the spool in your side pocket. Some people, especially women, can not resist the temptation to pick the thread off, and when you feel the spool spinning in your pocket, and you know you've got a bite, it's as much fun as catching fish."—Lexington Leader.

SAVES DAUGHTER

Advice of Mother no Doubt Prevents Daughter's Untimely End.

Ready, Ky.—"I was not able to do anything for nearly six months," writes Mrs. Laura Bralcher, of this place, "and was down in bed for three months."

I cannot tell you how I suffered with my head, and with nervousness and womanly troubles.

Our family doctor told my husband he could not do me any good, and he had to give it up. We tried another doctor, but he did not help me.

At last, my mother advised me to take Cardui, the woman's tonic. I thought it was no use for I was nearly dead and nothing seemed to do me any good. But I took eleven bottles, and now I am able to do all of my work and my own washing.

I think Cardui is the best medicine in the world. My weight has increased, and I look the picture of health."

If you suffer from any of the ailments peculiar to women, get a bottle of Cardui today. Delay is dangerous. We know it will help you, for it has helped so many thousands of other weak women in the past 50 years.

"I hasten to thank you heartily and sincerely for the magnificent gift you sent on behalf of generous friends in America to my brave soldiers. I am deeply touched to see your great country taking an interest in them. They deserve all the gifts which are made them because of the courage, energy and unalterable good humor they bring to the defense of a noble cause. You have helped to give them a little joy."

FOES OF LIQUOR IN DEMONSTRATION.

Harrisburg, Pa., April 6.—A public hearing on Governor Brumbaugh's local option bill, conducted by the legislative committee here today, ended forth with was probably the biggest anti-saloon demonstration in the history of Pennsylvania. A delegation of several thousands came from Philadelphia by special train and other cities of the state also sent good sized delegations. Representatives of the clergy, business and professional men, and leaders of organized labor spoke before the committee in behalf of the local option measure.

BIFF!

From "White Hope" Willard in 26th Round
Knocks Out Black Champion Johnson

Ringside, Havana, April 5.—Johnson entered the ring at 1:15 p. m., wearing his usual golden smile. The negro's first move was to ascertain where his wife was located.

Both pugilists weighed in on the scales in the ring. Willard's weight was at 238 pounds, Johnson's, 225.

At 1:28 the ring was ordered cleared. The pugilists then shook hands. Time was called at 1:53 New York time.

THE FATAL TWENTY-SIXTH.
When Johnson came up at the top of the bell he appeared slow. Willard lost no time. He opened with a smash to the champion's body. This was the moment that the Willard men had been awaiting. In the previous round Willard had reached that part of the body only with the greatest difficulty, and in the round before, Willard's best was to Johnson's face. But he had reached the champion's weak spot with a heavy smash, something few fighters, if any, had ever been able to do before.

The veteran retreated. He was at most mummy in the shrewdness with which he was conserving every ounce of his vitality. The look in his eyes told that that forty-fifth round looked a long way off. But youth was not to be denied. The challenger tore in, every atom of his being thrilled with the fire of battle, his eye lit up with the possibility of his own's brightest laurels. He rushed, and to the dismay of the men in Johnson's corner, slammed right and left to the veteran champion's body. A clinch was welcome to Johnson.

But his massive opponent, towering above him, bore him down till the champion's fiercer began to give way, and then Willard fiercely pushed him away. One blow and it was over. The great cowboy tossed his muscles, unhealed all his strength and sent the final smash home, a right to the jaw. Johnson, it seemed, but a moment before, was able to go a few rounds. When in the clinch he looked at his wife calmly. But now he toppled to the boards like a mighty oak, once king of the forest, but now a ruin. He had fought hard and been defeated, but he had shown that he was game to the core.

The scene that followed was indescribable to any but a mind that can measure excitement in tropical terms. Whereas a United States citizen would have let out a mighty roar and would have tried to climb into the ring, a few getting there, the hot blood of the Cuban made him beside himself. For the first time in history two giants had been seen there in battle and one of them, physically, the mightiest of his race, had been declared the winner. The crowd broke beyond all bounds and the soldiers were needed to clear the ring. The victor had almost to fight his way out of the arena.

Facts of Fight.
Principals—Jack Johnson, champion heavyweight, and Jess Willard, challenger.

Betting odds—At from 8 to 5 on Willard to 6 to 5 on Johnson.
Time and place—Havana, at 12:30 p. m. (12 noon, Maysville time).

The gate—Attendance about 30,000.
Receipts—Over \$100,000.

Johnson's share—\$50,000, guarantee and 25 per cent. of moving picture rights.
Willard's share—Half of receipts over \$55,000.

Referee—Jack Welsh of San Francisco.

WOMAN'S CLUB NOTES.
The people of Maysville and vicinity will be interested to know that on Friday last the Mason County Woman's Club, through its president, Mrs. Almer Hord, accepted a proposition from the Clifford V. Beveraux Dramatic Company, of New York, to produce a series of plays in this city during the month of July, the performances to be given in open air. The Beveraux Players are artists of unusual ability and include as one of their principals Miss Mary Wood Holton, one of Mason county's loveliest and most talented daughters.

Another important announcement was made that Mr. C. E.
